

Why the Ultraflex System?

“The best advantage to using Lustra’s Ultraflex system is not having to mess around with 55 gallon drums and also having the ability for anyone to be able to change chemicals.”

—Brett Meinberg,
Car Wash Express, CO

“Handling the Ultraflex system is easy. It’s as easy as popping the cap off and replacing the gallon jug. With Ultraflex, our cost per car has been reduced by about 15%.”

—Anthony Schlotfeldt, JetPro Auto Wash, WA

“We’ve cleared up a lot of space in the back room. It’s simpler to manage. We have less money tied up in inventory and you can completely fine-tune your wash.”

—Dustin Lessard, The Wave, WA

“The performance of Lustra’s Ultraflex out does conventional drums. I don’t even waste my time talking to other chemical suppliers. I’m 100% Ultraflex.”

—Dave Watson, The Chamois, Canada

“We no longer have to move heavy drums with Ultraflex. We have also seen a cost per car decrease with better results.”

—Stephen Weekes,
Upstate LaserWash, NY

“We switched to the Ultraflex system for the cost savings and the space savings in our back room. The space savings is incredible. Our back room is now uncluttered. It’s also very flexible, you can change the scents or colors within a few minutes.”

—Dan Kestle, Mr. Kleen, WA

“We switched to the Ultraflex system because we needed a product that would consistently produce a clean, shiny, dry vehicle.”

—Ron Prynne,
JetPro Auto Wash, WA

“I switched to Ultraflex because of how easy it is to control it, handle it and move it around. There is no more transferring of product from drum to drum - zero waste. We have consistently clean, shiny, dry cars. Day in and day out. The space savings is incredible. We went from drums taking over 20 feet of space to Ultraflex taking up only 4-5 feet. I have also seen cost savings anywhere from 15-20% in chemicals.”

—Matt Fuller, Fullers Car Wash, IL
